Supraclavicular lymph node metastases from malignant gastrointestinal stromal tumor of the jejunum: a case report with review of the literature

Chi Ma, Shao-Long Hao, Xin-Cheng Liu, Jin-Yao Nin, Guo-Chang Wu, Li-Xin Jiang, Alessandro Fancellu, Alberto Porcu, Hai-Tao Zheng

Abstract

Gastrointestinal stromal tumors (GISTs) represent the most common mesenchymal tumors of the alimentary tract. These tumors may have different clinical and biological behavior. Malignant forms usually spread via hematogenous route, and lymph nodes metastases rarely occur. Herein, we report a case history of a patient with jejunal GIST who developed
