ESPS Manuscript NO: 32029

Manuscript Type: ORIGINAL ARTICLE

Observational Study

Age-related impairment of esophagogastric junction relaxation and bolus flow time

Cock *et al.* EGJ function in aging

Charles Cock, Laura K Besanko, Carly M Burgstad, Alison Thompson, Stamatiki Kritas, Richard Heddle, Robert JL Fraser, Taher I Omari

Abstract

AIM

To investigate the functional effects of abnormal esophagogastric (EGJ) measurements in asymptomatic healthy volunteers over eighty years of age.
