**Magnetic anchor guidance for endoscopic submucosal dissection and other endoscopic procedures**

Mohamed Mortagy, Neal Mehta, Mansour A Parsi, Seiichiro Abe, Tyler Stevens, John J Vargo, Yutaka Saito, Amit Bhatt

### Abstract

Endoscopic submucosal dissection (ESD) is a well-established, minimally invasive treatment for superficial neoplasms of the gastrointestinal tract. The universal adoption of ESD has been limited by its slow learning curve, long procedure times, and high risk of complications. One technical challenge is the lack of a second hand that can provide traction, as in conventional surgery. Reliable tissue retraction that exposes the
