Checkpoint inhibitors in gastrointestinal cancers: Expectations and reality

Kourie HR *et al*. Checkpoint inhibitors in GI cancers

Hampig Raphael Kourie, Samer Tabchi, Marwan Ghosn

Abstract

Immune checkpoint inhibitors represent revolutionary anti-cancer agents, being rapidly approved in different malignancies and settings. Gastrointestinal (GI) cancers represent a wide variety of tumors with specific characteristics and different responses to various therapeutic alternatives; while some are chemo-sensitive others are chemo-resistant and only respond to more aggressive cytotoxic regimens, targeted therapies or a combination of both. Preliminary results of immune
