Platelets in liver disease, cancer and regeneration

Kurokawa T *et al.* Platelet in liver disease and cancer

Tomohiro Kurokawa, Nobuhiro Ohkohchi

Abstract

Although viral hepatitis treatments have evolved over the years, the resultant liver cirrhosis does not completely heal. Platelets contain proteins required for hemostasis as well as many growth factors required for organ development, tissue regeneration and repair. Thrombocytopenia, which is frequently observed in patients with chronic liver disease (CLD) and cirrhosis, can manifest from
