Fatal gastrointestinal histoplasmosis 15 years after orthotopic liver transplantation

Nikita Agrawal, David EJ Jones, Jessica K Dyson, Tim Hoare, Sharon A Melmore, Stephanie Needham, Nick P Thompson

Abstract

We report a case of ileo-colonic Histoplasmosis without apparent respiratory involvement in a patient who had previously undergone an orthotopic liver transplant (OLT) for primary biliary cholangitis 15 years earlier. The recipient lived in the United Kingdom, a non-endemic region for Histoplasmosis.
