Retrospective Study

Nomogram to predict overall survival after gallbladder cancer resection in China

Bai Y *et al*. A survival prediction model for GBC

Yi Bai, Zhi-Song Liu, Jian-Ping Xiong, Wei-Yu Xu, Jian-Zhen Lin, Jun-Yu Long, Fei Miao, Han-Chun Huang, Xue-Shuai Wan, Hai-Tao Zhao

Abstract

AIM

To integrate clinically significant variables related to prognosis after curative resection for gallbladder carcinoma into a predictive nomogram.

METHODS

One hundred forty-two gallbladder cancer (GBC) patients who underwent curative intent surgical resection at Peking Union Medical College Hospital (PUMCH) were included. This retrospective case study was conducted at PUMCH of the Chinese Academy of Medical Sciences and Peking Union Medical College (CAMS & PUMC) in China from January 1, 2003 to January 1,
