Basic Study

Herbs-partitioned moxibustion alleviates aberrant cell apoptosis of the intestinal epithelium by upregulating A20 expression in a mouse model of Crohn's disease

Zhou J *et al.* Effect of HPM on Crohn's disease

Jing Zhou, Lu-Yi Wu, Liu Chen, Ya-Jing Guo, Yi Sun, Tao Li, Ji-Meng Zhao, Chun-Hui Bao, Huan-Gan Wu, Yin Shi

Abstract

BACKGROUND

A20 inhibits intestinal epithelial cell apoptosis in Crohn's disease, and herbs-partitioned moxibustion (HPM) has been demonstrated to be an effective treatment for Crohn's disease. However, the mechanism of HPM in reducing apoptosis in Crohn's disease has not been thoroughly elucidated to date.

AIM

To elucidate whether HPM is exerted by upregulating A20 to affect intestinal epithelial cell apoptosis in a Crohn's disease mouse model.
