Systematic Review

Complete or partial split in associating liver partition and portal vein ligation
for staged hepatectomy: A systematic review and meta-analysis

Huang HC *et al.* Comparison of p-ALPPS and ALPPS

Abstract

BACKGROUND

Associating liver partition and portal vein ligation for staged hepatectomy (ALPPS) has been readily adopted by liver surgeons in recent years. However,

Role of associating liver partition and portal vein ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4402295>

Apr 21, 2015 - Core tip: **Associating liver partition and portal vein ligation for staged hepatectomy** (ALPPS) has emerged as a new method for patients with comprehensive **liver** metastases and a small future **liver** remnant. This **review** is an attempt to clarify the role of ALPPS in the context of colorectal **liver** metastases (CRLM). In this **review**, it is shown that the resection rate was 97.1%.
