Review of the diagnosis of gastrointestinal lanthanum deposition

Masaya Iwamuro, Haruo Urata, Takehiro Tanaka, Hiroyuki Okada

Abstract

Lanthanum carbonate is used for treatment of hyperphosphatemia mostly in patients with chronic renal failure. Although lanthanum carbonate is safe, recently, lanthanum deposition in the gastrointestinal mucosa of patients has been reported in the literature. This review provides an overview of gastroduodenal lanthanum deposition and focuses on disease's endoscopic, radiological, and histological features, prevalence, and outcome, by reviewing
