Assessing Risk Factors for Severe COVID-19 Illness | CDC
https://www.cdc.gov/.../assessing-risk-factors.html ▾
Nov 30, 2020 · COVID-19 can affect anyone, and the disease can cause symptoms ranging from mild to very severe. For some other illnesses caused by respiratory viruses (such as influenza), some people may be more likely to have severe illness than others because they have characteristics or medical conditions that increase their risk.

Corticosteroids, But Not TNF Antagonists, Are Associated ...
https://www.gastrojournal.org/article/S0016-5085(20)30655-7/fulltext
May 18, 2020 · The impact of Coronavirus disease 2019 (COVID-19) on patients with inflammatory bowel disease (IBD) is unknown. We sought to characterize the clinical course of COVID-19 among patients with IBD and evaluate the association among demographics, clinical characteristics, and immunosuppressant treatments on COVID-19 outcomes.

Risk stratification and geographical mapping of Brazilian inflammatory bowel diseases patients during COVID-19 outbreak: Results from a nationwide survey

Risk Stratification and Geographical Mapping of Brazilian Inflammatory Bowel Diseases Patients During COVID-19 Outbreak

Abstract

BACKGROUND

COVID-19 pandemic is still evolving globally, and Brazil is currently one of the most affected countries. It is still debated whether patients with Inflammatory Bowel Diseases (IBD) are not in a higher risk for developing COVID-19 or its complications.

https://www.cdc.gov/coronavirus/2019-ncov/covid... ▾

Feb 11, 2020 · The COVID-19 Mathematical Modeling landing page will link together documents posted by the Modeling Task Force, including mortality forecasts, hospitalization forecasts, pandemic planning scenarios, and the COVID-19 Surge Tool. The modeling documents are in different places on the CDC web site, so having a modeling landing page will make it easier for readers to find them.

COVID-19 Event Risk Assessment Planning Tool
https://covid19risk.biosci.gatech.edu ▾

This map shows the risk level of attending an event, given the event size and location. You can reduce the risk that one case becomes many by wearing a mask, distancing, and gathering outdoors in smaller groups The risk level is the estimated chance (0-100%) that at least 1 COVID-19 positive individual will be present at an event in a county, given the size of the event.
