Hepatitis C virus elimination in Indonesia ...

https://pubmed.ncbi.nlm.nih.gov/31454466

Backgrounds & aims: In Indonesia 1.9 million people are chronically infected with hepatitis C virus (HCV), but a national strategic plan for elimination has not yet been developed, despite the availability of low-cost treatments which could save many lives. We used epidemiological and cost modelling to estimate targets and resource requirements of a national elimination program and explore the potential impact ...
