Systemic inflammatory syndrome in COVID-19–SISCoV study ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC8128982>

The **study** by Lamers et al. using human small **intestinal** organoids (hSIO) demonstrated a high affinity of SARS-CoV and **SARS-CoV-2** virus to enterocytes. 46 Gastrointestinal inflammation can be attributed to mucosal chemotaxis mediated by CCL20, CCL28, and is evident by elevation of the inflammatory markers in blood like MUC4, MUC15, and FOLH1.
