Medical condition

Symptoms Diagnosis Causes Treatments &gt;

Acute pancreatitis is a serious condition where the pancreas becomes inflamed over a short period of time. The pancreas is a small organ located behind the stomach and below the ribcage.

[NHS](#)**Symptoms**

The main symptom of acute pancreatitis is a severe, dull pain around the top of your stomach that develops suddenly.

This aching pain often gets steadily worse and can travel along your back or below your left shoulder blade. Eating or drinking...

[Read more on NHS](#)**Causes**

Most cases of acute pancreatitis are closely linked to gallstones or to alcohol consumption, although the exact cause isn't always clear.

**Gallstones**

Gallstones are hard pieces of stone-like material that form in your gallbladder. They can trigger...
