Gestational Diabetes Mellitus: New Diagnostic Criteria

<https://www.scirp.org/journal/PaperInformation.aspx?PaperID=62753> ▾

With these new diagnostic criteria, it is estimated that the prevalence of **GDM** will increase by approximately 18%, thus generating a greater impact on costs in the health system and better care for pregnant women in an attempt to reduce fetal and maternal complications caused by disease. Table 1.
