Lean diabetes mellitus: An emerging entity in the era of obesity

Amrutha Mary George, Amith George Jacob, Leon Fogelfeld

#### Abstract

Much has been published on the characteristics of Type 2 DM and its association with the epidemic of obesity. But relatively little is known about the incidence of lean diabetes, progression of disease and fate of the patients with low-normal BMI (<25). Studies in developing countries have shown that **the clinical characteristics of these patients include history of childhood malnutrition, poor socioeconomic status,** relatively early age of onset and absence of ketosis on
