#### Case Control Study

Association of *NFKB1* gene polymorphism (rs28362491) with levels of inflammatory biomarkers and susceptibility to diabetic nephropathy in Asian Indians

Amar Gautam, Stuti Gupta, Mohit Mehndiratta, Mohini Sharma, Kalpana Singh, Om P Kalra, Sunil Agarwal, Jasvinder K Gambhir

#### Abstract

**Aims:** To investigate the association of *NFKB1* gene -94 ATTG insertion/deletion (rs28362491) polymorphism with inflammatory markers and risk of diabetic nephropathy in Asian Indians.

**Methods:** A total of 300 subjects were recruited (100 each), normoglycemic, (NG); Type 2 DM without any complications (DM) and Type 2 DM with diabetic nephropathy (DM-CRD). Analysis was carried out by PCR-RFLP and ELISA. Pearson's correlation, analysis of variance and logistic regression were used for statistical analysis.
