Observational Study

Clinico-epidemiological factors of **health related quality of life among people with type 2 diabetes**

Azra Mamaghanian, Seyed Morteza Shamshirgaran, Nayyereh Aiminisani, Akbar Aliasgarzadeh

Abstract

Background: Health related quality of life is an important outcome measure in chronic diseases. This study aimed to investigate the quality of life and its clinical and epidemiological correlates among people with type 2 diabetes in Northwest of Iran.

Methods: This cross-sectional study was conducted in Tabriz, Northwest of Iran,
