Appendiceal tie syndrome: A very rare complication of a common disease

Laligen Awale, Brikh Raj Joshi, Saroj Rajbanshi, Shailesh Adhikary

Abstract

Acute Appendicitis is the most common surgical emergency that we encounter. Adynamic Intestinal obstruction due to appendicitis or its complication may be seen time and often. Mechanical obstruction because of appendicitis is uncommon and even rarer for a closed loop obstruction to occur. Although it was described as early as 1901, very few cases have been reported. We report the case of a 20 year male who presented with generalized colicky pain abdomen, abdominal distension, vomiting and
