Capillary refill time as a guide for operational decision-making process of autoimmune pancreatitis: Preliminary results

Pinar Yazici, Ismail Ozsan, Unal Aydin

### Abstract

**AIM:** To investigate the efficacy of a novel intraoperative diagnostic technique for patients with preliminary diagnosis of autoimmune pancreatitis (AIP).

**METHODS:** Patients with pancreatic surgery were reviewed to identify those who received a preliminary diagnosis of AIP between January 2010 and January 2014. The following data were collected prospectively for patients with a pathological diagnosis of AIP: clinical and demographic features, radiological and operative findings, treatment
