Delayed esophageal perforation occurring with endoscopic submucosal dissection: A report of two cases

Yasuhiro Matsuda, Naoki Kataoka, Tomoyuki Yamaguchi, Masafumi Tomita, Kazuki Sakamoto, Shinichiro Makimoto

Abstract

We report two cases of delayed esophageal perforation occurring with endoscopic submucosal dissection. Our cases involved delayed perforation after 10 days in case 1 and after 6 days in case 2. Both cases were related to solid food. **1** We performed subtotal esophagectomy with gastric tube reconstruction of the esophagus via the subcutaneous
