Retrospective Study

Impact of surgical delay on outcomes in elderly patients undergoing emergency surgery: A single center experience

Marc Ong, Tan Yu Guang, Tan Kok Yang

Abstract

AIM: To determine predisposing factors leading to surgical delay in elderly patients with acute abdominal conditions and its impact on surgical outcomes.

METHODS: A retrospective review of a total of 144 patients aged 60 years and older who had undergone emergency abdominal surgery between 2010 and 2013 at a regional general hospital was analysed. The operations analysed were limited to perforated or gangrenous viscus and strangulated hernia. Patient demographic features, time taken to
