Treatment options for spontaneous and postoperative sclerosing mesenteritis

Jennifer Klasen, Ulrich Güller, Brigitte Muff, Daniel Candinas, Christian A Seiler,
René Fahrner

Abstract

Sclerosing mesenteritis is a rare pathology with only a few described cases in the literature. The etiology is unclear; however, several potential triggers, including abdominal surgery and abdominal trauma, have been discussed. The pathology includes a benign acute or chronic inflammatory process affecting the adipose tissue of the mesenterium. Despite it being a rare disease, sclerosing mesenteritis is an
