Manuscript Type: Case Report

Giant abdominal osteosarcoma causing intestinal obstruction treated with resection and adjuvant chemotherapy

Alexandros Diamantis, Grigorios Christodoulidis, Dionysia Vasdeki, Foteini Karasavvidou, Evangelos Margonis, Konstantinos Tepetes

## Abstract

Extraskelletal osteosarcoma (EOS) is an uncommon tumor that accounts for 1% of all soft tissue sarcomas and 4% of all osteosarcomas. Its presentation may be atypical, while pain has been described as the most common symptom. Radiological findings include a large mass in the soft-tissues with massive calcifications, but no attachment
