Retrospective Study

Delayed gastric emptying following pancreaticoduodenectomy: incidence, risk factors, and healthcare utilization

Somala **Mohammed**, George **Van Buren** II, Amy McElhany, Eric J Silberfein, William E Fisher

Abstract

AIM

To characterize incidence and risk factors for DGE following pancreaticoduodenectomy and examine its implications on healthcare utilization.

METHODS

A prospectively-maintained database was reviewed. DGE was classified using International Study Group of Pancreatic Surgery criteria. Patients who developed DGE and those who did not were compared.

Match Overview

1	Crossref 25 words "Friday, February 21, 2014, 2:55pm-4:55pm Parallel Long Oral Abstract A Liver", HPB, 2014.	6%
