[www.giejournal.org/article/S0016-5107\(16\)00465-X/abstract](http://www.giejournal.org/article/S0016-5107(16)00465-X/abstract)

Recently **sessile serrated adenoma/polyp** (SSA/P) has been gathering an increasing amount of attention. It is known that SSA/P often occurs in the right side colon and has BRAF mutation, so SSA/P is thought to be a precancerous lesion of colon cancer due to microsatellite instability. However, although SSA/Ps have ...

### [\(ADR\) and Sessile Serrated Adenoma Detection Rate \(SSADR\)](#)

[www.giejournal.org/article/S0016-5107\(17\)31452-9/fulltext](http://www.giejournal.org/article/S0016-5107(17)31452-9/fulltext)

**Adenoma detection rate** (ADR) has been established as a key quality marker in colonoscopy. Improvements in **adenoma detection rates** are proven to be associated with a reduction in colorectal cancer risk. It is postulated that **serrated adenoma detection rate** may be a more stringent marker of quality. The **correlation** ...

作者: J Naylor - 2016

Adenoma detection rate (ADR) is a measure of colonoscopy quality that is correlated with interval colon cancer occurrence. Sessile serrated polyp detection rate (SDR) may provide additional information on
