Borrmann Type 4 Advanced Gastric Cancer: Focus on the ...
<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4977748>

Jul 25, 2016 · Early diagnosis of **Borrmann type 4 advanced gastric cancer (AGC)** is very important for improving the **prognosis** of AGC patients. Because there is no definite mass in most cases of **Borrmann type 4 AGC**, its accurate diagnosis via endoscopy requires an understanding of its pathogenesis and developmental process.

Retrospective evaluation of lymphatic and blood vessel ...
<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6700032>

Aug 15, 2019 · Core tip: In this study, we found that lymphatic and/or blood vessel invasion (LBVI) + status was associated with **Borrmann type IV**, low histological grade, large tumor size, and advanced pT and pN status. The 5-year survival rate of LBVI+ patients was significantly lower than that of LBVI- patients. No significant difference was observed in the **prognosis** of **Borrmann type III/LBVI+** disease ...

Retrospective evaluation of lymphatic and blood vessel ...

<https://www.ncbi.nlm.nih.gov/pubmed/31435465>

Aug 15, 2019 · AIM: To evaluate the prognostic significance of lymphatic and/or blood vessel invasion (LBVI) combined with the Borrmann type in advanced proximal gastric cancer (APGC). METHODS: The clinicopathological and survival data of 440 patients with APGC who underwent curative surgery between 2005 and 2012 were retrospectively analyzed.

Retrospective Cohort Study

Effect of the Borrmann types combined with vessel invasion status on the prognosis of advanced gastric cancer

Zhai Z *et al.* A retrospective study

Zhao Zhai, Zi-Yu Zhu, Yu Zhang, Xin Yin, Bang-Ling Han, Jia-Liang Gao, Sheng-Han Lou, Tian-Yi Fang, Yi-Min Wang, Chun-Feng Li, Xue-Feng Yu, Yan Ma, Ying-Wei Xue

Abstract

BACKGROUND

The Borrmann types (type I-IV) for the macroscopic classification of advanced gastric cancer has been accepted worldwide, and the LBVI (+) status is related to the poor prognosis after gastric cancer.

Aug 13, 2020 · Due to the controversy over the prognostic significance of **Borrmann type** in patients with **gastric cancer** (GC), the present study was to investigate the clinical value of **Borrmann type** in **advanced** GC. We retrospectively evaluated 2092 patients with **advanced** GC and subsequently examined the clinicopathological characteristics and **prognosis** of patients stratified by **Borrmann type**.

<https://www.ncbi.nlm.nih.gov/pubmed/31435465>

Aug 15, 2019 · RESULTS: In these 440 patients, **LBVI+ status** was associated with Borrmann type IV, low histological grade, large tumor size, and advanced pT and pN status. The 5-year survival rate of LBVI+ patients was significantly lower than that of LBVI- patients, although LBVI was not an independent prognostic factor in the multivariate analysis.
