<https://www.asge.org/docs/default-source/default...>

This American Society for Gastrointestinal Endoscopy guideline provides evidence-based recommendations for the endoscopic management of gastric outlet obstruction (GOO). We applied the Grading of Recommendations, Assessment, Development and Evaluation methodology to address key clinical questions. These include the com-

Malignant bowel obstruction in advanced cancer patients ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3421464>

Jun 13, 2012 Malignant bowel obstruction (MBO) is a frequent complication in advanced cancer patients, especially in those with abdominal tumors. Clinical management of MBO requires a specific and individualized approach that is based on disease prognosis and the objectives of care. The global prevalence of MBO is estimated to be 3% to 15% of cancer patients. Surgery should always be ...

x Unifocalization of the major aorto-pulmonary collaterals (MAPCAs) followed by intra-cardiac repair with ventricular septal defect (VSD) closure and restoration of right ventricle to pulmonary artery (RV-PA) continuity is the ultimate treatment goal in a case of VSD with pulmonary atresia (PA) and MAPCAs. It may be achieved in a single stage or may require multiple surgeries.
