Colorectal cancer diagnosis: Pitfalls and opportunities

Pablo Vega, Fátima Valentín, Joaquín Cubiella

20

Abstract

Colorectal cancer (CRC) is a major health problem in the western world. The diagnostic process is a challenge in all health systems for many reasons: there are often no specific symptoms; lower abdominal symptoms are very common and mostly related to non-neoplastic diseases, not CRC; diagnosis of CRC is mainly based on colonoscopy, an invasive procedure; and the resources for diagnosis are usually scarce. Furthermore, the available predictive models for CRC are based on the evaluation of symptoms and their diagnostic accuracy is
