Esophageal granulosa cell tumors: case report and literature review

Hong-Qun Wang, Ai-Jun Liu

Abstract

We reported 5 cases of granulosa cell tumors (GCTs) of esophagus and reviewed the literature. **9** There were 4 females and 1 male with a median age of 43 years and an average age of 44 years. All of the cases had solitary tumors. Tumor size was 0.4-2.5 cm in diameter. Gastroscopy revealed that 2 cases were located in the middle esophagus, 1 case in the upper esophagus, and 2 cases in the distal one. Five cases displayed gray-white, pink, yellow mucosal
