**Review:** Colon adenoma features and their impact on risk of future advanced adenomas and colorectal cancer

Calderwood AH *et al.* Adenoma features and risk of future adenomas

Audrey H Calderwood, Karen E Lasser, Hemant K Roy

### Abstract

Colorectal cancer (CRC) is the second leading cause of cancer death in the United States. Most CRCs arise from a histologically-specific type of polyp in the colon, the adenoma. Understanding the association between adenomas and the risk of both future adenomas and CRC ('colonic neoplasia') helps inform the management of patients with adenomas
