Is metastatic pancreatic cancer an untargetable malignancy?

Hampig Raphael Kourie, Joseph Gharios, Fadi Elkarak, Joelle Antoun,
Marwan Ghosn**Abstract**

Metastatic **pancreatic cancer** (MPC) is one of the most aggressive malignancies, known to be chemo-resistant and have been recently considered resistant to some targeted therapies (TT). Erlotinib combined to gemcitabine is the only targeted therapy that showed an overall survival benefit in MPC. New targets and therapeutic approaches, based on new-targeted therapies, are actually being evaluated in MPC, going from
