Lung cancer metastasis to the gastrointestinal system: An enigmatic occurrence

Kanthi Rekha Badipatla, Niharika Yadavalli, Trupti Vakde, Masooma Niazi,
Harish K Patel

Abstract

Adenocarcinoma of the lung infrequently metastasizes to the gastrointestinal tract. We report a rare case of a 65-year-old male with no respiratory symptoms diagnosed with adenocarcinoma of the lung by histopathological examination of metastatic sites which included an ulcer in the gastric body and a mass in the rectum. Metastatic disease also involved the liver as well. Patient was treated with
