## Mesenchymal Stem Cells Home to Sites of Injury and ...

[www.ncbi.nlm.nih.gov](http://www.ncbi.nlm.nih.gov) > ... > Adv Wound Care (New Rochelle)

Ponte AL, Marais E, Gallay N, Langonne A, Delorme B, Herault O, Charbord P, Domenech J. The in vitro migration capacity of **human bone** marrow **mesenchymal stem cells**: comparison of chemokine and growth factor chemotactic activities. **Stem Cells**. 2007; 25:1737.

## Bilateral Transplantation of Allogenic Adult Human Bone ...

[www.ncbi.nlm.nih.gov](http://www.ncbi.nlm.nih.gov) > ... > Stem Cells Int > v.2012; 2012

In view of the preceding results, in this study we wanted to understand the safety and feasibility of bilateral "allogenic" bone-marrow-derived mesenchymal stem cells for PD. The rationale was to rule out bone marrow aspiration in the aging population of PD patients and the morbidity associated with it.

## Comparison of the bone regeneration ability between stem ...

<https://www.sciencedirect.com/science/article/pii/S0006291X18303930>

**Stem cells** from **human** exfoliated deciduous teeth (SHED) are a major candidate for playing a significant role in tissue engineering and regenerative medicine. The aim of this study was to **elucidate** the nature of **bone** regeneration by SHED as compared to that of **human** dental pulp **stem cells** (hDPSCs) and **bone marrow mesenchymal stem cells** (hBMSCs).

## (PDF) VEGF expression by mesenchymal stem cells ...

[https://www.researchgate.net/publication/23135732\\_VEGF\\_expression...](https://www.researchgate.net/publication/23135732_VEGF_expression...)

Little is known about the factors that enable the mobilisation of **human mesenchymal stem cells** (MSC) from the **bone marrow** into the blood stream and their recruitment to and retention in the tumour.

## Treatment of Lateral Epicondylitis by Using Allogeneic ...

<https://stemcells.journals.onlinelibrary.wiley.com/doi/full/10.1002/...>

Clinical use of **mesenchymal stem cells** in the **treatment** of tendinopathy has not been well studied because it may be related to the invasive procedures required to obtain **autologous stem cells**.

**Allogeneic stem cells** may be an optimal **treatment** option for tendinopathy, if safety and efficacy can be conclusively demonstrated.

## Mesenchymal Stem Cells Home to Sites of Injury and ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3623614>

**Mesenchymal stem cells** (MSCs) have shown significant therapeutic potential in preclinical animal models of wound healing. However, the translation of MSC-based therapeutics to clinical practice has been delayed by questions including the mechanisms of MSC homing, engraftment, and ultimate function.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4515054>

**Mesenchymal stem cells** and its characteristics. MSCs were first identified about 30 years ago by Friedenstein and colleagues as an adherent fibroblast-like population in the **bone** marrow capable of differentiating into **bone** []. Since then MSCs have been isolated from **human bone** marrow based on their ability to adhere to tissue culture plastic []. ...
