## The Multifaceted p21 (Cip1/Waf1/CDKN1A) in Cell ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6770903>

Aug 21, 2019 · Simply interfering with **p21** as **anti-cancer therapy** bears risks and undesired **side effects**. First, increasing **p21** can **cause senescence**, a supposed permanent growth arrest, which was believed to be only **tumor suppressive terminating tumor regression**, and is now regarded as a **tumor promoter**.

Cited by: 1

## Cancers | Free Full-Text | The Multifaceted p21 (Cip1/Waf1 ...

<https://www.mdpi.com/2072-6694/11/9/1220/htm> ▾

Apart from its roles in **cell cycle regulation** including mitosis, **p21** is involved in differentiation, cell migration, cytoskeletal dynamics, apoptosis, transcription, DNA repair, reprogramming of induced **pluripotent stem cells**, autophagy and the onset of **senescence**. **p21** acts either as a **tumor suppressor** or as an oncogene depending largely on the cellular context, its subcellular localization ...

## p21 in Cancer Research - ncbi.nlm.nih.gov

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6721478>

Aug 14, 2019 · As we explained above, targeting **p21 gene** in **cancer treatments** is disputable; however, **p21** is involved in many pathways that could be targeted instead of **p21** itself to overcome the controversy. **p21** is regulated in different levels: Transcriptionally, post-transcriptionally and post-translationally; genes or transcription factors that are found in downstream or upstream of **p21** in these functional/regulatory pathways could be the target in **therapeutic** ...
