Manuscript Type: REVIEW

Mechanisms involved in selecting and maintaining neuroblastoma cancer stem cell populations, and perspectives for therapeutic targeting

Farina AR *et al.* Neuroblastoma cancer stem cells: mechanisms and therapeutics

Antonietta Rosella Farina, Lucia Annamaria Cappabianca, Veronica Zelli, Michela Sebastiano, Andrew Reay Mackay

Jan 01, 2019 · Third, **neuroblastoma** is a very heterogeneous disease, and one therapy does not fit all. However, as highlighted in this chapter, over the past decades, a deeper understanding of the biology and molecular **mechanisms involved** in the pathogenesis of **neuroblastoma** has led to the identification of more biologically defined subsets of patients.

May 27, 2019 · **Neuroblastoma** (NB) is the most common extracranial solid tumor often diagnosed in childhood. Despite intense efforts to develop a successful treatment, current available therapies are still challenged by high rates of resistance, recurrence and progression, most notably in advanced cases and highly malignant tumors. Emerging evidence proposes that this might be due to a subpopulation of **cancer** ...
