Stem cell therapy in the management of shoulder rotator cuff disorders

Maria Valencia Mora, Miguel A. Ruiz Ibán, Jorge Diaz Heredia, Raul Barco
 Laakso, Ricardo Cuéllar, Mariano Garcia Arranz

Abstract

Rotator cuff tears are frequent shoulder problems that are usually dealt with surgical repair. Despite improved surgical techniques, the tendon-to-bone healing rate is unsatisfactory due to difficulties in restoring the delicate transitional tissue between bone and tendon. It is essential to understand the molecular mechanisms that determine this failure. The study of the molecular
