Stem cells and its heart work

Joseph C Bilgimol, Subbareddy Ragupathi, Lakshmanan Vengadassalapathy, Nathan S Senthil, Kalimuthu Selvakumar, M Ganesan, Sadananda Rao Manjunath

#### Abstract

Stem Cells are of global excitement for various complications including Heart diseases. It is worth to understand the mechanism or role of stem cells in the treatment of heart failure. Bone Marrow derived Stem Cells are commonly practiced with an aim to improve the function of the heart. Majority of studies has been conducted with acute myocardial infarction and a few has been investigated with the use of stem cells for treating chronic or dilated cardiomyopathy. Heterogeneity in the treated group using stem cells has greatly propounded. Ever increasing demand for any alternative made is of at most priority for Cardiomyopathy. Stem Cells are of top priority with the current impact that has generated among physicians. However it requires meticulous selection of proper source since redundancy is clearly evident with the present survey. This review focuses on the methods adopted using stem cells for Heart diseases and outcomes that are generated so far with an idea to determine the best therapeutic
