 Racial disparity in colorectal cancer: Gut microbiome and <sup>2</sup>cancer stem cells

Sachin Goyal, Pratima Nangia-Makker, Lulu Farhana, Yingjie Yu, Adhip P.N. Majumdar

## Abstract

Over the past two decades there has been remarkable progress in cancer diagnosis, treatment and screening. The basic mechanisms leading to pathogenesis of various types of cancers are also understood better and some patients, if diagnosed at a particular stage go on to lead a normal pre-diagnosis life. Despite these achievements, racial disparity in some cancers remains a mystery. The higher incidence, aggressiveness and mortality of breast, prostate and colorectal cancers in African-Americans as compared to Caucasian-Americans are now well documented. The polyp-carcinoma sequence in colorectal cancer and easy access to colonic epithelia or colonic

## Match Overview

1	<b>CrossCheck</b> 105 words Farhana, Lulu, Fadi Antaki, Mohammad R. Anees, Pratima Nangia-Makker, Stephanie Judd, Timothy Hadden, Edi Lev	3%
