Linear endoscopic ultrasound evaluation of hepatic veins

Sharma M *et al.* EUS of hepatic veins

Malay Sharma, Piyush Somani, Chittapuram Srinivasan Rameshbabu

Abstract

Liver resection surgery can be associated with significant perioperative mortality and morbidity. Extensive knowledge of the vascular anatomy is essential for successful, uncomplicated liver surgeries. Various imaging techniques like multidetector computed tomographic and magnetic resonance angiography are used to provide information about hepatic vasculature. Linear endoscopic ultrasound (EUS) can offer a detailed evaluation of hepatic veins, help in
