[A Comparison of Regional Versus General Anesthesia for ...](#)[https://journals.lww.com/anesthesia-analgesia/...](https://journals.lww.com/anesthesia-analgesia/)**Methods****Results****Discussion**

The National Library of Medicine's Medline database and the Cochrane Database of Systematic Reviews were searched for the time period 1966 to April 2005. A previously recommended search strategy using multiple search terms and text words was used without language restrictions (11). The terms "ambulatory surgical procedures," "ambulatory care," and the text word "outpatient" were combined with the term "OR." This search set was then combined with the following search sets with "AND." The term "spinal a...

duction blocks were considered to be **regional anesthesia**. **Regional anesthesia** was further separated into central neuraxial block and peripheral nerve block. Fifteen (1003 patients) and 7 (359 patients) **trials** for central neuraxial block and peripheral nerve block were included in the **meta-analysis**. Both central neuraxial block and peripheral nerve block were associated with increased ...

[Laparoscopic cholecystectomy under spinal anaesthesia vs ...](#)<https://bmcanesthesiol.biomedcentral.com/articles/10.1186/s12871-015-0158-x> ▾

Dec 03, 2015 · **Laparoscopic Cholecystectomy (LC)** is conventionally performed under **general anaesthesia (GA)**, but there are multiple studies which have found **spinal anaesthesia (SA)** as a safe alternative. This **meta-analysis** was performed after adding many recent **randomized controlled trials (RCTs)** to clarify this issue. Relevant articles published in English were identified by searching ...

**Estimated Reading Time:** 9 mins[Comparison of Postoperative Events between Spinal ...](#)<https://www.hindawi.com/journals/bmri/2016/9480539> ▾

**Background** . **Laparoscopic cholecystectomy** is usually carried out under **general anesthesia**. There were a few studies which have found **spinal anesthesia** as a safe alternative. We aimed to evaluate the postoperative events between **spinal anesthesia** and **general anesthesia** in patients undergoing **laparoscopic cholecystectomy**. **Methods** . We searched PubMed, Embase, and Cochrane Library ...
