Endoscopic management of bariatric complications: A review and update

Caolan Walsh, Shahzeer Karmali

Abstract

With over a third of Americans being considered obese, bariatric procedures have now become the most performed operation by general surgeons in the United States. The most common operations are the Laparoscopic Roux-en-Y Gastric Bypass (LRYGB), the Laparoscopic Sleeve Gastrectomy (LSG), and the Laparoscopic Adjustable Gastric Band (LAGB). With over 340 000 bariatric procedures performed worldwide in 2011, the absolute number of complications related to these operations is also increasing. Complications,
