Retrospective Study

Transanal endoscopic microsurgery as optimal option in treatment of rare rectal lesions: A single centre experience

Monica Ortenzi, Roberto Ghiselli, Maria Michela Cappelletti Trombettoni, Luca Cardinali, Mario Guerrieri

Abstract

AIM: To analyze the outcomes of transanal endoscopic microsurgery (TEM) in the treatment of rare rectal condition like mesenchymal tumors, condylomas, endometriosis and melanoma

METHODS: We retrospectively reviewed a twenty-three years database. Fifty-two patients were enrolled in this study. The lesions were considered suitable for TEM if they were within
