 Peroral endoscopic reduction of dilated gastrojejunal anastomosis after bariatric surgery:  
 Techniques and efficacy

Kinesh Changela, Emmanuel Ofori, Sushil Duddempudi, Sury Anand, Shashideep Singhal

**Abstract**
 AIM: To investigate the techniques and efficacy of peroral endoscopic reduction of dilated  
 gastrojejunal anastomosis after bariatric surgery

**METHODS:** An extensive English language literature search was conducted using Pubmed, Medline, Medscape and Google to identify peer-reviewed original and review articles using the keywords 'bariatric endoscopic suturing,' 'overstitch bariatric surgery,' 'endoscopic anastomotic reduction,' 'bariatric surgery,' 'gastric bypass,' 'obesity,' 'weight loss.' We identified articles describing technical feasibility, safety, efficacy, and adverse outcomes of overstitch endoscopic suturing system for transoral outlet reduction in patients with weight regain following RYGB. All studies that contained material applicable to the topic were considered. Retrieved peer-reviewed original and review articles were reviewed by the authors and the data extracted using a standardized collection tool. Data were analyzed using statistical analysis as percentages of the event.

**RESULTS:** Four original published articles which met our search criteria were pooled. The total
