Endoscopic retrograde cholangiopancreatography in modified double tracks anastomosis with anastomotic stenosis

Xiao-Song Wang, Fei Wang, Quan-Peng Li, Lin Miao, Xiu-Hua Zhang

Abstract

A 63-year-old man presented at our hospital with right upper abdomen pain and fever for 4 days. The patient's magneticresonance cholangiopancreatography (MRCP) revealed dilated commonbileduct, and choledocholithiasis. In his past history, he received proximal gastrectomy and modified double tracks anastomosis. Endoscopic
