Assessment of the July effect in post-endoscopic retrograde  
 cholangiopancreatography pancreatitis: Nationwide Inpatient Sample

 Schulman AR *et al.* July effect in post-ERCP pancreatitis

Allison R Schulman, Marwan S Abougergi, Christopher C Thompson

## Abstract

### AIM

To assess incidence of post-endoscopic retrograde cholangiopancreatography (post-ERCP) pancreatitis in the early (July/August/September) versus the late (April/May/June) academic year and evaluate in-hospital mortality, length of stay (LOS), and total hospitalization charge between these time periods.
