Clinical predictors for the diagnosis of sessile serrated polyposis syndrome: A case control study

Case Control Study

Clinical predictors for Sessile Serrated Polyposis Syndrome: A case control study

Yang Wu, Alexander Mullin, Alina Stoita

Abstract

AIM

To compared individuals with Serrated Polyposis Syndrome (SPS) to those with Sessile Serrated adenoma (SSA) and adenomas in the setting of endoscopists with high adenoma detection rates at a secondary and tertiary academic centre.
