**Manuscript Type:** MINIREVIEWS

**Adiponectin as a novel biomarker for liver fibrosis**

**Wanvisa Udomsinprasert, Sittisak Honsawek, Yong Poovorawan**

1 **Abstract**

2 Adiponectin is known to play primary roles in the regulation of systemic glucose  
3 homeostasis and lipid metabolism. Interestingly, emerging evidence indicates  
4 beneficial effects of adiponectin on liver fibrosis; however, the exact mechanisms of  
5 this action remain unclear. Herein, we aimed to summarize the recent findings  
6 regarding the role of adiponectin in liver fibrogenesis and update the current  
7 comprehensive knowledge regarding usefulness of adiponectin-based treatments in
