Grandhe S *et al.* Presentation of abdominal pain with hepatomegaly

Sirisha Grandhe, Joy A Lee, Ankur Chandra, Christopher Marsh, Catherine T Frenette

**Abstract**

Abdominal pain with elevated transaminases from inferior vena cava (IVC) obstruction is a relatively common reason for referral and further workup by a hepatologist. The differential for the cause of IVC obstruction is extensive, and the most common etiologies include clotting disorders or recent trauma. In some situations these more frequent causes have been ruled out, and the underlying process for the patient's
