Multidisciplinary approach for multifocal, bilobar hepatocellular carcinoma: A case report and literature review

Kevin P Labadie, Stephanie K Schaub, Derek Khorsand, Guy Johnson, Smith Apisarnthanarax, James O Park

Abstract

BACKGROUND

Hepatocellular carcinoma (HCC) is the second most lethal malignancy worldwide. There has been virtually no change in the survivability of HCC in spite of improvement in therapies. Surgery is considered the ideal first, curative intervention however most patients present in advanced stages with unresectable disease. Therefore, systemic and liver-directed non-operative therapies are initially offered to downstage the disease. To ensure optimal management a multidisciplinary team approach is often warranted. Our
